WFP Food Distribution Analysis

Kakuma Refugee Camp & Kalobeyei Integrated Settlement

Overview

WFP distributed 3,865,388 kg of food across 15,000 household records (165,043 beneficiaries) at seven locations in Kakuma and Kalobeyei between January 2023 and December 2025, using 10 distribution centers.

Key Metrics

Metric	Value
Households served	15,000
Beneficiaries reached	165,043
Total food distributed	3,865,388 kg
Average food per household	257.7 kg
Distribution centers	10
Completion rate	33.9%
Average delay (delayed records)	7.0 days

Distribution by Location (kg)

Location	Quantity (kg)	Share
Kakuma 2	565,331	14.6%
Kakuma 4	558,964	14.5%
Kalobeyei Village 1	557,337	14.4%
Kalobeyei Village 3	554,826	14.4%
Kalobeyei Village 2	551,516	14.3%
Kakuma 1	542,417	14.0%
Kakuma 3	534,998	13.8%

Distribution is well balanced across locations, each receiving roughly 14% of total volume — no single site is over- or under-served.

Distribution by Nationality (kg)

Nationality	Quantity (kg)
Uganda	514,112
DRC Congo	497,711
South Sudan	488,111
Burundi	485,573
Rwanda	477,304
Sudan	469,889
Ethiopia	468,128
Somalia	464,561

Ugandan households received the largest share, but the spread across all eight nationalities is narrow (within ~10% of each other), indicating equitable allocation.

Food Commodities Distributed

Super Cereal (666,645 kg) and Vegetable Oil (652,760 kg) were the most distributed commodities, followed closely by Maize Flour, Beans, Rice, and Salt — all within a tight range of 635,000-650,000 kg, reflecting a standardized food basket.

Trends Over Time

Annual volume held steady across the three-year period: 2023 (1,294,168 kg), 2024 (1,288,664 kg), and 2025 (1,282,557 kg) — a stable food assistance pipeline with no major seasonal spike or decline.

Operational Performance

- Completed: 5,082 records (33.9%)
- Partially Completed: 4,989 records (33.3%)
- Delayed: 4,929 records (32.9%)

Roughly two-thirds of distributions face delays or partial completion, pointing to recurring operational bottlenecks (logistics, staffing, or supply) that warrant further investigation.

Recommendations

- Investigate root causes of delays/partial completions, since they affect 66% of distributions.
- Maintain the current equitable allocation approach across locations and nationalities.
- Monitor commodity mix to ensure nutritional balance is sustained as the refugee population changes.
